

LAMINAM 12+

Large-format porcelain slabs.

The new alternative to quartz countertops.

LAMINAM 12+

Laminam 12+ is an oversized porcelain slab that's changing the way kitchens, bars and restaurants are designed.

In the last decade, quartz countertops became a popular solution for anyone looking for a durable, easy-to-maintain countertop. It offered a non-porous, mold-resistant, easy-to-clean surface.

Recently, Laminam, a leading, Italian porcelain tile manufacturer, introduced a material that offers all these features and more. The material, Laminam 12+, is a large-format porcelain slab that offers the benefits of quartz, along with more design options and superior technical capabilities, such as stain, heat and UV resistance.

Chop the veggies.

Pour the wine.

Brûlée the dessert.

64" x 128" x 0.47"
(1620mm x 3240mm x 12mm)

Laminam 12+ is suitable for:

- Residential
- Multi-Unit Residential Condominiums
- Multi-Unit Residential Apartments
- Resorts & Hotels
- Restaurants & Bars
- Retail
- Health Clubs & Spas
- Stadiums & Arenas

- Kitchen Countertops
- Outdoor & Grilling Spaces
- Tabletops
- Vanities
- Bartops
- Flooring
- Exterior cladding

Scratch Resistant

The surface can be used for cutting and chopping.

Stain Resistant

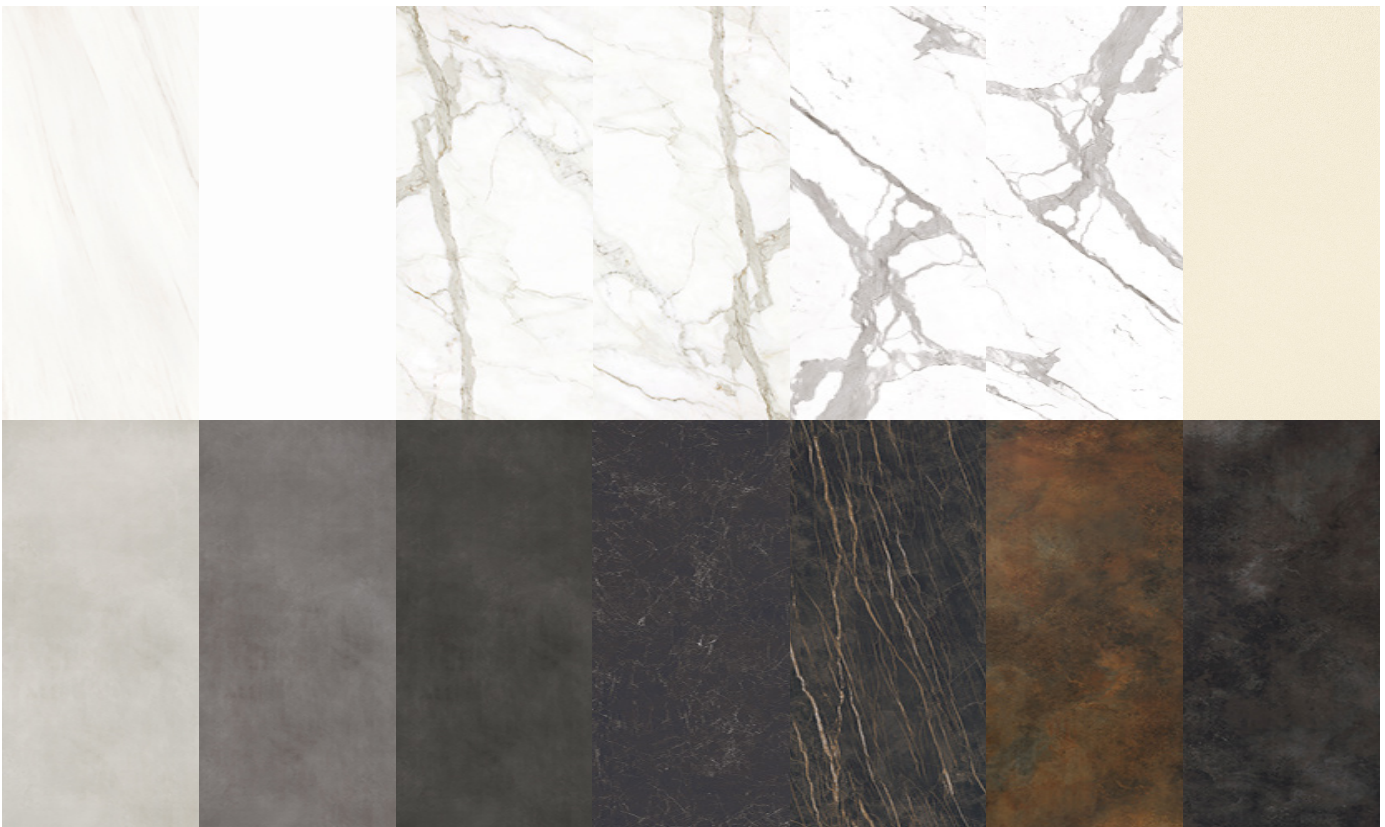

It's virtually non-porous, so it's less likely to stain.

Heat Resistant

Hot dishes can come in direct contact with the surface.

Will Not Fade

It's resistant to UV light, so won't fade or discolor when used outdoors.
