CONTENT IN DESCENDING ORDER OF QUANTITY

Undisclosed (Ceramic tiles)

Inventory and screening notes: Ceramic tiles are considered as a single component resulting from chemical and physical reactions from the high temperatures reached in the kiln. No warnings or hazards are associated with the final, finished product.

VOLATILE ORGANIC COMPOUND (VOC) CONTENT

VOC content data is not applicable for this product category.

Description: All ceramic tiles manufactured by PERONDA GROUP, S.A. Do not emit VOCs because they are manufactured in ovens at high temperatures, in the innervation of 1050°C to 1200°C, depending on the type of ceramic tiles. These high temperatures guarantee the total destruction of any possible organic compound. At temperatures above 450°C-500°C, organic compounds cannot exist in the ceramic tiles that are in the cooking process.

It is concluded that all ceramic tiles cooked at these temperatures (1050-1200°C) in the facilities of PERONDA GROUP, S.A. they do not contain organic compounds and,

PERONDA
GROUP

therefore, they cannot emit to the atmosphere neither VOCs during their use and manipulation, nor when they are installed in any place (building, terrace, facade, etc.).

GENERAL NOTES

HARMONY brand does contain any volatile organic compounds (VOCs). Ceramic tiles meet LEED qualifications for an “inherently non-emitting source” and hence do not require testing.

HARMONY brand It is composed of a percentage of recycled material from the tile boy waste. The content in recycled material may qualify to obtain LEED points for a “Recycled content”.
